

Triperio F1

Type:

Uniform, bigger head size cabbage with excellent head coverage that guarantees freshness to the market.

Triperio is a blue-green cabbage with a compact large head.

Has a strong stem elevation above ground with very high uniformity in the field.

Nursery period: Exactly 3 weeks.

Earliness:

Very vigorous plant therefore is ready for transplant earlier than other cabbage seeds.

Maturity:

90 days after transplanting.

Plant:

Excellent head cover and high yielding.

Yield:

70-90 tonnes per acre.

Head size: 7-10kgs.

Shape: Round.

Disease tolerance:

- Strong against black rot disease, thrips and Diamond Back Moth (DBM).
- High resistance to Fusarium yellows.

10,000 seeds per acre
