## Afrodite

A medium-dark green cylindrical hybrid traditional variety for open field cultivation. This is a vigorous variety, with medium-long internodes. Its high precocity yielding marketable fruits and its high productivity rate make it ideal for use in open fields, leading to excellent yields, even in a short growing cycle. Medium-dark green classic fruit, with a regular cylindrical shape, even when longer and larger than usual. Afrodite continues to be a variety that is highly appreciated due to its small flower scar, excellent post-harvest preservation times, resistance during transport and handling

### Technical data

Fruit	Medium-Dark Green, Uniform Cylindrical Shape, Small and Neat Flower Scar, Attractive Quality, Good Shelf Life
Plant Vigour	Erect Leaves, Open Plant, Productive
Earliness	Early
Maturity	45 – 50 days
Average Fruit size	Length: 10-20cm, Diameter: 3.5 to 4cm
Disease Resistance: I	IR: CMV / WMV / ZYMV
